<b>Qualifications in audit report on historical financial information:</b> There are no qualifications in the audit report of the Issuer on its audited historical financial information.
<b>What are the key risks that are specific to the Issuer?</b>
The Issuer is subject to the following key risks:
<ul style="list-style-type: none"><li>• The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.</li><li>• The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.</li><li>• The COVID-19 pandemic has had, and will likely continue to have, negative impacts on the businesses and overall results of operations and financial condition of the Group which could be material. Any such negative impact on the Group (including the Issuer), could adversely affect the ability of the Issuer to fulfil its obligations under the Securities, and consequently the value of and return on the Securities may also be adversely affected.</li></ul>

<b>Qualifications in audit report on historical financial information:</b> There are no qualifications in the audit report of the Guarantor on its audited historical financial information.			
<b>Key risks in respect of the Guarantor:</b> The Guarantor is subject to the following key risks:			
<ul style="list-style-type: none"> <li>The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities, including the global COVID-19 pandemic, which may negatively impact the businesses of the Guarantor and its ability to fulfil its obligations under the Securities, and the value of and return on the Securities.</li> <li>The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.</li> <li>If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured debt claims (such as the under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.</li> </ul>			
<b>What are the key risks that are specific to the Securities?</b>			
The Securities are subject to the following key risks:			
<ul style="list-style-type: none"> <li>You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled redemption may vary due to a number of interrelated factors, including the value, dividend yield and volatility of the Underlying and any changes in interim interest rates if applicable, and a sale of Securities prior to their scheduled redemption may be at a substantial discount from the original purchase price and you may lose some or all of your investment. If, at maturity, the Final Reference Level of the Underlying is less than its Redemption Initial Level, the Securities may be redeemed for less than your initial investment or even zero. Further, you will receive no interest during the term of the Securities.</li> <li>The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.</li> <li>Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities.</li> <li>Amounts due in respect of the Securities are linked to the performance of the Underlying, which is a preference share. The value of the preference share will depend on the terms and conditions of such preference share (in particular the provisions relating to the return and the performance of the Preference Share Underlying and the financial condition and standing of the preference share issuer. If the value of the preference share decreases the value of the Securities and the redemption amount payable at their maturity are expected to decrease correspondingly. The levels and basis of taxation on the Securities and any reliefs for such taxation will depend on your individual circumstances and could change at any time. The tax and regulatory characterisation of the Securities may change over the life of the Securities. This could have adverse consequences for you.</li> <li>Amounts due in respect of the Securities are linked to the performance of the Underlying, which is in turn linked to the performance of a security index. Global economic, financial and political developments, among other things, may have a material effect on the value of the component securities of, and/or the performance of, a security index, and in recent</li> </ul>			

years, currency exchange rates and prices for component securities have been highly volatile. This may in turn affect the value of and return on the Underlying and in turn the Securities.

- The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive distributions or any other rights with respect to an Underlying (or constituent comprised in any relevant Preference Share Underlying). A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying or other items which may comprise the Underlying in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- As the terms and conditions of the Underlying include provisions dealing with the postponement of a valuation date, if any date used for the valuation or any determination of any Preference Share Underlying is delayed or the value/level of the relevant Preference Share Underlying is determined using a fall-back by reason of (as applicable) a non-scheduled trading day, a disrupted day or the occurrence of an adjustment event, such postponement or fall-back determined may have a material adverse effect on the value of and return on the Underlying and in turn the Securities. The terms and conditions of the Underlying include provisions relating to adjustment events. The occurrence of any such adjustment event may result in an adjustment to the terms of the Underlying or its early redemption. Any such adjustment will be reflected in the value of the Securities and may have an adverse effect on the value of such Securities. If the Underlying is redeemed early, the Securities will also be redeemed early, and the amount repaid to you could be substantially less than your initial investment.
- The terms and conditions of the Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- In certain circumstances (for example, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early redeemed. If the Securities are redeemed early, the amount paid may be less than your initial investment and you may therefore sustain a loss.
